

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., February 1, 1915.

SIR:

I have the honor to transmit herewith an abstract of the decennial investigation of wealth, debt, and taxation for the fiscal year 1913.

This abstract contains the principal summary tables and necessary text from the bulletins, "Assessed valuation of property and amounts and rates of levy: 1860-1912;" "National and state indebtedness and funds and investments: 1870-1913;" "County and municipal indebtedness: 1913, 1902, and 1890; and sinking fund assets: 1913;" "Taxation and revenue systems of state and local governments;" "National and state revenues and expenditures: 1913 and 1903; and public properties of states: 1913;" "County revenues, expenditures, and public properties: 1913;" and "Municipal revenues, expenditures, and public properties: 1913." In addition, a synopsis of the contents of each of the seven bulletins is given. This is done in order that those interested in a special bulletin may know of such a publication and the contents thereof.

This abstract was prepared under the supervision of Starke M. Grogan, chief statistician in charge of Wealth, Debt, and Taxation; John Lee Coulter, expert special agent in an advisory capacity; and Arthur J. Hirsch, chief of division.

Respectfully,

Director of the Census.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

BULLETIN—ASSESSED VALUATION OF PROPERTY AND AMOUNTS AND RATES OF LEVY: 1860-1912.

The tables taken from this bulletin present, by geographic divisions and states, the assessed valuation of all property subject to the general property or ad valorem tax, the assessed valuation of real property and improvements subject to ad valorem taxation, the per capita assessed valuation of all property and also of real property and improvements subject to ad valorem taxation, the total levies of ad valorem taxes, the per capita levies of ad valorem taxes, and the average tax rate per \$100 of assessed valuation for all purposes, for the census years 1860 to 1912, inclusive. For the year 1912 the assessed valuation of all property subject to ad valorem taxation, and the ad valorem taxes levied by specified civil divisions, are shown by geographic divisions and states.

The properties subject to ad valorem taxation in the several states, and the methods of assessment for purposes of taxation, are set forth in a bulletin entitled "Taxation and revenue systems of state and local governments," issued by the Bureau of the Census under date of October 15, 1914, which should be studied in connection with the tables on assessed valuation, levies of ad valorem taxes, and average tax rates.

ASSESSED VALUATION OF ALL PROPERTY.

Table 1 presents, by geographic divisions and states, the assessed valuation of all property subject to the general property or ad valorem tax for the census years 1860 to 1912, inclusive. For 1870 two columns are presented, one showing the currency values reported at that time by local authorities, and the other showing the gold equivalents of those reported values.

In 1870 the assessed valuation on the gold basis was less than in 1860 by \$678,953,531. This decrease was the resultant of the growth and shrinkage in such valuations during the 10-year period. It is estimated that the value of the slaves included in the valuations of the southern states in 1860 amounted to \$1,500,000,000. This valuation disappeared entirely prior to the assessment of 1870. If the assessed valuation of slaves could be deducted from the total valuations of 1860, it would probably be found that the assessed valuation of properties of the classes assessed in 1870 were about the same at the beginning and close of the decade, showing that for this period the growth and destruction of property values approximately balanced each other.

(10)

ASSESSED VALUATION OF REAL PROPERTY.

Table 2 presents, by geographic divisions and states, the valuation of real property as assessed for ad valorem taxation. It gives that portion of the valuation included in Table 1 which represents the assessment of land and the improvements thereon for the various census years from 1860 to 1912, inclusive. A comparison of the data contained in Tables 1 and 2 discloses the fact that the assessed valuations of real estate form widely varying percentages of the total assessed valuations in the different census years. These variations are due more largely to different methods of assessing personal property and of classifying railroad property than to changes in the assessed valuations of real property.

LEVIES OF AD VALOREM TAXES.

Table 4 presents, by geographic divisions and states, a summary of the general property or ad valorem taxes levied in the several census years from 1860 to 1912. The tax levies presented in this table furnish information much more definite than that supplied by the tables relating to assessed valuations. These levies measure definitely the amount which the people were called upon to contribute to the support of the state and local governments in the form of general property taxes. They do not, however, measure the relative contributions demanded of the people for the support of these governments at the different census years. Many changes have been made in the classification of properties for taxation whereby certain corporations are taxed on their earnings instead of on the valuation of their tangible property. Furthermore, there are special property taxes, business taxes, special assessments, licenses, fees, and other classes of revenue, which in the different years have been substituted in varying degrees for the general property or ad valorem taxes.

AVERAGE TAX RATES.

Table 5 presents, by geographic divisions and states, 1860 to 1912, the average tax rates, or the nominal rates which represent the relation between the tax levies shown in Table 4 and the assessed valuations shown in Table 1. Their variations bring out prominently the differences in the general trend of classification of properties and methods of assessment in the different states.

¹ For purposes of comparison with state totals for other years, the combined valuation of real and personal property reported by the Tenth Census was decreased \$32,668,566 by the Eleventh Census; but the proportion of this decrease which should apply to real property is not given, and therefore the valuation of real property remains unchanged.

² Dakota Territory.

³ Combined assessed valuation of Oklahoma and Indian Territory.

¹ For purposes of comparison with state totals for other years, the combined valuation of real and personal property reported by the Tenth Census was decreased \$32,668,566 by the Eleventh Census; but the proportion of this decrease which should apply to real property is not given, and therefore the valuation of real property remains unchanged.

² Dakota Territory.

³ Real property of Oklahoma; no real property assessed in Indian Territory. Improvements on land classed as personal property.

BULLETINS—

NATIONAL AND STATE INDEBTEDNESS AND FUNDS AND INVESTMENTS: 1870-1913.

COUNTY AND MUNICIPAL INDEBTEDNESS: 1913, 1902, AND 1890; AND SINKING FUND ASSETS: 1913.

The following tables and comments on indebtedness are taken from the bulletin "National and state indebtedness and funds and investments: 1870-1913," and from the bulletin "County and municipal indebtedness: 1913, 1902, and 1890; and sinking fund assets: 1913."

The public indebtedness less sinking fund assets of the Nation, the states, and all minor civil divisions of government in the United States amounted to \$4,850,460,713 in 1913. This is an increase of \$2,011,564,591, or 70.9 per cent, over the amount reported for 1902. During the period from 1890 to 1902 the total indebtedness increased \$849,783,280, or 42.7 per cent. The per capita indebtedness increased \$13.98, or 38.8 per cent, and \$4.23, or 13.3 per cent, respectively, during the two periods mentioned.

The net indebtedness of the National Government increased \$59,106,814, or 6.1 per cent, from 1902 to 1913, and \$117,544,489, or 13.8 per cent, from 1890 to 1902. Owing to the rapid growth in the population, the per capita debt decreased \$1.63, or 13.3 per cent, from 1902 to 1913, and \$1.38, or 10.1 per cent, from 1890 to 1902.

The debt incurred by the 48 state governments increased \$106,573,034, or 44.5 per cent, and the per capita debt increased \$0.54, or 17.8 per cent, during the period 1902 to 1913. From 1890 to 1902 the net indebtedness of the states increased \$28,158,784, or 13.3 per cent, and the per capita debt decreased \$0.34, or 10.1 per cent.

The cities, villages, towns, townships, school districts, drainage, irrigation, and levee districts, fire districts, poor districts, road districts, and all other minor divisions of government in the United States having power to incur debt, reported a net indebtedness of \$3,475,954,353 in 1913. This is an increase of \$1,845,884,743, or 113.2 per cent, over the amount reported for 1902. A small part of this increase is due doubtless to a more complete canvass in the later year. During the period from 1890 to 1902 the net indebtedness of the minor divisions increased \$704,080,007, or 76 per cent. The per capita net debt

increased \$5.95, or 40.2 per cent, from 1890 to 1902, and \$15.07, or 72.7 per cent, from 1902 to 1913.

TOTAL AND PER CAPITA INDEBTEDNESS LESS SINKING FUND ASSETS OR FUNDS AVAILABLE FOR PAYMENT OF DEBT, OF THE NATIONAL GOVERNMENT AND THE 48 STATE GOVERNMENTS: 1870 TO 1913.

Historical summary: 1870 to 1913.—Table 8 shows, for the United States and for the 48 states combined, as well as the total and per capita of these two classes, the debt less sinking fund assets or cash in treasury available for the payment of debt for 1870 and 1880, and for each year from 1890-91 to 1912-13. In the case of states where only biennial reports were available it was necessary to assume that the debt less sinking fund assets remained the same for the two years. In the case of states where reports were intermittent or irregular it was necessary to accept the figures for debt nearest to the year under consideration.

In order to show the general tendency of indebtedness the per capita debt less sinking fund assets or cash in treasury available for the payment of debt is shown. This item is based upon the estimated population as of July 1 for each year, except 1870, 1880- and 1890-91, when the population as officially compiled was used.

An examination of Table 8 shows that the debt of the National Government was higher in 1870 than at any other time since that date, the per capita debt in

1870 being \$60.46. This debt in 1870 was a material decrease over the debt as it stood August 31, 1865. On that date the indebtedness of the National Government, less funds available for the payment of debt, amounted to \$2,756,431,571, which was an average of \$79.44 for every inhabitant of the country. The decrease between 1865 and 1870 was very rapid, and by 1880 the indebtedness of the National Government had decreased to such an extent that with the increase in population the per capita amounted to only \$38.27. Ten years later this had been reduced to \$13.60, at which point it remained, with only comparatively slight fluctuations, increasing somewhat during the Spanish-American War and decreasing somewhat since that date, until at the last date reported the indebtedness of the National Government amounted to only \$10.59 per capita, or an amount slightly higher than in 1907, when the per capita indebtedness was \$10.05, the lowest amount recorded.

No data are available to show the debt of the 48 state governments, or the territory from which they have been formed, in 1865, but from Table 8 it will be seen that in 1870 the indebtedness of the 48 state governments, or their counterparts, less sinking fund assets, was \$352,866,698, or \$9.15 per capita. The indebtedness of the state governments decreased in somewhat the same proportion as the indebtedness of the National Government, and in 1880 the average per capita debt for the 48 state governments was \$5.48. Ten years later this had been reduced to \$3.37. Further fluctuations during the last 20 years brought the average down to \$2.67 in 1909, the lowest amount shown in the period covered. Since 1909 there has been more or less increase, the average per capita for the 48 state governments being \$3.57 on June 30, 1913.

Although there is a net decrease during the period covered in the actual outstanding indebtedness, a material part of the decrease in per capita debt both for the National Government and the 48 state governments is due to the very material increase in population. Considering the total debt for the National Government and the 48 state governments, the total amount outstanding decreased from \$2,684,036,654 in 1870 to \$1,374,506,360 in 1913, a decrease of almost 50 per cent. In contrast, the per capita decreased from \$69.61 to \$14.15. The lowest point in the per capita debt was in 1907, when it amounted to \$12.74.

The bulletin, "National and state indebtedness and funds and investments: 1870-1913," contains statements and tables in detail for the individual states.

CLASSIFICATION OF DEBT OF THE NATIONAL GOVERNMENT: 1870 TO 1913.

Historical summary: 1870 to 1913.—Table 9 gives a summary of the indebtedness of the United States for 1870, 1880, and also for each year from 1891 to 1913, under three general headings: Bonds, debt bearing no interest, and certificates and notes issued on deposits of coin and gold and silver bullion. Cash in the Treasury available for the payment of debt is also shown.

In each year the total debt and the classes thereof are given, as well as the cash, the total debt less this cash, and the per capita debt. In computing the per capita figures estimates of population based on the average percentage of increase from census to census have been used, except 1870, 1880, and 1890-91.

¹ Consists of currency trust funds, gold reserve fund, and General Treasury cash.**INDEBTEDNESS OF THE STATES: SUMMARY BY STATES.**

General summary by states, June 30, 1913.—Table 10 presents, by states, for June 30, 1913, or the nearest date thereto for which figures are available, a summary of the debt and productive funds and investments for each state in the United States, as well as the total for the 48 states. In the case of indebtedness, funded and floating debt are shown separately; and, under funded debt, outstanding bonds are separated from special

debt obligations to public trust funds. Under funds and investments, cash and securities are shown separately. Sinking fund assets are included under productive funds and investments, and in addition are shown separately, and also subtracted from the total debt for each state, thus leaving an item which is as nearly comparable for the 48 states as any item which can readily be segregated. The total and the per capita debt less sinking fund assets, and the fiscal year for which the report was secured, are shown for each state.

¹ Per capita based upon population estimated as of July 1, 1912, for those states in which the fiscal year closed in that year.

² Included with municipal debt.

³ Sinking fund exceeds total debt by \$126,351.

⁴ No debt reported in West Virginia.

COUNTY AND MUNICIPAL INDEBTEDNESS: 1913, 1902, AND 1890; AND SINKING FUND ASSETS: 1913.

Historical summary: 1890 to 1913.—The tables taken from this bulletin present, by states, the statistics of indebtedness of counties or parishes, and all minor civil divisions, the latter including cities, villages, towns, townships, boroughs, precincts, fire districts, irrigation districts, poor districts, school districts, etc.

The aggregate given is believed to include the indebtedness of every political division and subdivision of the United States other than that of the National Government and the 48 state governments whose indebtedness was reported in the bulletin. entitled

"National and state indebtedness and funds and investments: 1870-1913."

The tables include the statistics of public indebtedness, by states, of counties or parishes, and minor civil divisions of continental United States; that is, the United States exclusive of Alaska, Hawaii, Porto Rico, and the Philippines. The figures presented are comparable with those for the different census periods.

The classification of debt presented in some of the tables which follow is divided into funded or fixed indebtedness, floating and current, special assessment loans, revenue loans, and judgments and warrants. Complete definitions of these terms will be found in the bulletin, "County and municipal indebtedness, 1913, 1902, and 1890, and sinking fund assets, 1913."

BULLETINS—

NATIONAL AND STATE REVENUES AND EXPENDITURES: 1913 AND 1903; AND
PUBLIC PROPERTIES OF STATES: 1913.

COUNTY REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913.

MUNICIPAL REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913.

This abstract contains the principal summary tables and the necessary text from the three bulletins, entitled "National and state revenues and expenditures: 1913 and 1903; and public properties of states: 1913," "County revenues, expenditures, and public properties: 1913," and "Municipal revenues, expenditures, and public properties: 1913."

The data presented for incorporated places include the transactions for school and other independent districts when they are practically coextensive with the incorporated places, while the transactions for the

National Government, the states, and counties are exclusive of all independent divisions. Certain civil divisions, such as townships, road, drainage, irrigation, and levee districts, etc., and school districts in incorporated places of less than 2,500 are not reported in these tables.

In the bulletins will be found text in which the receipts and payments of each state are discussed, and definitions of accounting terminology, in which revenue and nonrevenue receipts and governmental and nongovernmental cost payments are fully explained.

THIRTEENTH CENSUS (1910) PUBLICATIONS.

All of the volumes of the final census reports, giving the results of the Thirteenth Decennial Census of 1910, have been issued. The volumes, numbered 1 to 21 (comprising 10,379 pages), constituting the complete reports of the census, which are listed below, were issued in limited editions, intended chiefly for libraries, institutions, and special students of statistics. Because of the restricted distribution, any individual who desires to receive any or all of the volumes is asked to accompany his request by an explanatory statement which will justify the Director of the Census in placing his name upon the mailing list. The following list gives the title or description of each of the reports and bulletins issued in connection with the Thirteenth Census:

FINAL REPORTS OF THE THIRTEENTH CENSUS.

ABSTRACT BULLETINS—GENERAL AND TOTAL.

The Abstract is more convenient for most persons than the voluminous final reports.

The following list gives a summary of the chapters:

POPULATION.

1. Number and distribution of inhabitants.

2. Color or race, nativity, and percentage; sex; population 25 years of age and over; males of adult age.

3. Age and marital condition.

4. State of birth of native population.

5. Population of foreign birth and foreign parentage, by country of origin.

6. Foreign-born population—Date of immigration.

7. School attendance and literacy.

8. Dwellings and families.

AGRICULTURE.

9. Farms and farm property.

10. Tenure, mortgage indebtedness, color and nativity of farmers, and size of farms.

11. Live stock on farms and elsewhere.

12. Live-stock products, and domestic animals sold or slaughtered on farms.

13. Farm crops—Acreage, production, and value.

14. Irrigation and irrigated crops.

MANUFACTURES.

15. Statistics for states, cities, and industries.

MINES AND QUARRIES.

16. Mines and quarries.

STATE BULLETINS.

The state bulletins, of which a few copies are available for distribution, give, for each particular state, detailed results of the census for the various branches of population, agriculture, and manufactures.

These fall into several distinct series, as follows:

POPULATION.

First series.—By counties and minor civil divisions. Gives the population of the state, the density of population, and the actual and rural population, with tables showing the population in 1910 and 1900 for each county and for each minor civil division with 1 the county.

Second series.—General composition and characteristics of the population, statistics of color, nativity, percentage, sex, citizenship, literacy, school attendance, and dwellings and families, with tables for all counties, and for cities having 2,500 or more inhabitants.

The contents of these bulletins were printed in Volumes II and III of the final reports.

AGRICULTURE.

First series.—Number of farms, farm property, live stock, principal crops, and farm expenses.

Second series.—Represents the material for the first series, and gives additional information in regard to tenure, live-stock products, and minor crops, and presents a complete record for each state and for each county of all the agricultural data gathered at the census of 1910.

The contents of these bulletins were printed in Volumes VI and VII of the final reports.

MANUFACTURES.

Statistics for manufactures for the states and for principal cities and industries. The contents of these bulletins, which were issued for each state, and for principal industries, were printed in Volumes IX, Reports by states, with statistics for principal cities, and Volumes X, Reports for principal industries.

ABSTRACT BULLETINS.
